Finite Mathematics for Business,Economics, Life Sciences and SocialSciences Plus NEW MyLab Math. applied-mathematics-frank-budnick-solution-manualrar.pdf. The answer of this question can be found here. A: I found the answer for the second problem on the link you shared: To calculate the point (1,1) according to the lines given in the picture, one should do the following:  $y = x - 1$   $x = y + 2$   $x = 1 + 2$   $x = 1.6$  After doing these steps, the point is (1,1) The answer for the first problem I found here. Q: Is the "nearly identical" independent? I'm working on a question for my Maths exam and have encountered the following: If  $XY$  is almost equal to  $YX$ , then is  $XY$  independent of  $YX$ ? My approach is that if  $XY$
